

Provider acquisition status and next actions

Operational source of truth for the 16 implemented coverage-acquisition paths. An implemented path is not evidence of official API status, permission for bulk use, or complete geographic acquisition.

Snapshot: 2026-08-16

Scope: acquisition only

Target levels: provisional

Provider	Path / form	Current progress	Provisional target	Next action	Operational status	Owner
Google Street View	sv-map Google overlay; raster PNG	Global z5 discovery complete; 63,728 positive z10 cells in the 13-source analysis.	z13 raster; z14 selected areas only.	Audit negative-grid recall, then freeze a bounded z13 inventory.	READY / LEVEL REVIEW	—
Apple Look Around	LookMap layered raster, MVT and coverage JSON	Global z5 discovery complete; 20,646 positive z10 cells. Public-instance bulk use is not approved.	z12 MVT; z13 or z17 only where justified.	Confirm an authorized or self-hosted endpoint before a fine-scale run.	ACCESS-GATED / LEVEL REVIEW	—
Baidu	Baidu-native raster with alpha-pixel reprojection	Corrected z10 discovery; 2,169 positive Web-z10 cells. Hong Kong and other Chinese cities rebuilt.	z13 raster; z14 focal cities.	Compare z13 and z14 road retention, then freeze the native-grid inventory.	READY / LEVEL REVIEW	—
Tencent Street View	Local PMTiles archive; MVT lines	Archive decoded and integrated: 4,932,670 features from 10,303 decoded native-z12 tiles.	Native z12 archive.	Verify archive provenance and retain native geometry; no network reacquisition.	COMPLETE BASELINE	—
Naver	Street-only mt=ps raster with dynamic frontend version	Complete Korea z14 inventory: 29,313 tiles, 25,289 non-empty; included in analysis.	z14 baseline; review z15.	Compare z14 and z15 across urban, rural and minor-road samples.	COMPLETE BASELINE / LEVEL REVIEW	—
Kakao	PNG_RV02 raster on reversed Kakao native grid	Complete Korea L6 inventory: 27,190 tiles, 23,524 non-empty; included.	Native L6 baseline; review finer adjacent levels.	Compare L6 and finer native levels using common ground-resolution metrics.	COMPLETE BASELINE / LEVEL REVIEW	—
KartaView	Sequence coverage raster PNG	Endpoint and zoom behaviour validated; no complete bounded inventory; not included in the 13-source analysis.	z13 candidate.	Define candidate scope, then compare z13 with finer supported levels.	PILOT ONLY / SCOPE + LEVEL REVIEW	—
Mapillary	Public overview, sequence and image MVT layers	z5 overview discovery complete: 708,399 overview points and 48,882 positive z10 cells included.	z10 sequence; z11 higher-fidelity candidate.	Move zoom-aware layer routing into the shared library and test z10 versus z11.	READY / LEVEL REVIEW	—
Streetview.vn	sequences MVT lines	Vietnam z8 discovery complete: 47,901 features from 78 tiles; included.	z11 sequence MVT.	Compare adjacent levels and prepare the full Vietnam bounded job.	READY / LEVEL REVIEW	—
Yandex	Street-view raster on Yandex elliptic-Mercator grid	Discovery and HTTP 204 audit complete; 2,647 positive z10 cells included.	z13 raster; z14 local option.	Rebuild persisted empty-state artifacts offline, then review z13 versus z14.	READY / LEVEL REVIEW	—
Mappls RealView	Authorized Web Maps SDK capture; line coverage	India z10 capture complete with audited boundary waivers; 2,396 positive cells included.	z13 capture.	Run a deterministic negative-grid audit before choosing filtered or full-scope z13.	ACCESS-GATED / LEVEL REVIEW	—
MapJack	dots_r5 alpha GIF coverage raster	Chiang Mai endpoint and pilot behaviour validated; no full bounded run; not included.	z16 candidate.	Confirm service scope, compare adjacent levels and define a low-rate bounded job.	PILOT ONLY / LEVEL REVIEW	—
Barikoi ThirdEye360	ThirdEye360 point MVT	z14 and z16 pilot decoding succeeded; service polygons not frozen; not included.	z14 candidate.	Freeze supported city polygons and test point-count stability across levels.	PILOT ONLY / SCOPE + LEVEL REVIEW	—
Panoramax	Local GeoParquet point export; optional MVT fallback	115,998,261-point local projection acquired and integrated; 20,261 occupied z10 cells.	Native points; no routine tile zoom.	Reconstruct trajectories from collection, links and time fields before tile fallback.	COMPLETE BASELINE	—
Mapilio	map_roads_line MVT with non-standard path order	Global z6 recovery closed at zero unresolved; 2,786 positive z10 cells included.	z10 MVT candidate.	Validate local geometry retention and build the positive-cell bounded queue.	READY / LEVEL REVIEW	—
Mapy.com	Panorama-line raster with redirect-based transparent empty tiles	Complete Czechia z14 inventory: 33,663 tiles, 29,424 non-empty; included.	z14 baseline; review finer adjacent levels.	Compare z14 with finer levels across urban, rural and boundary samples.	COMPLETE BASELINE / LEVEL REVIEW	—

Status vocabulary

COMPLETE BASELINE: current baseline is acquired and usable. READY: implementation is available and the next job can be prepared. PILOT ONLY: only local or case-level acquisition is validated.

Review gates

ACCESS-GATED: production acquisition requires authorized access. LEVEL REVIEW: target resolution must be rechecked. SCOPE REVIEW: service or candidate extent must be frozen first.
